

DocuShare OCR Crawler Bundles

Offered exclusively by Criteria First

<http://www.criteriafirstware.com/DocuShare-OCR-Crawler-p386.html>

Bundle	Price
DocuShare OCR Crawler perpetual license with 1 year ASM For use with ABBYY FineReader PDF Corporate or Recognition Server or FineReader Server. Additional years of Criteria First Annual Support & Maintenance.	\$2,399 \$399
DocuShare OCR Crawler 5K PPM Annual Subscription Bundle with support & maintenance <i>Recommended for DocuShare sites with need to process up to 5,000 pages per month and no other OCR workflow requirements.</i> DocuShare OCR Crawler module ABBYY FineReader PDF Corporate Edition for 2 core processing	\$965
DocuShare OCR Crawler 100K Pages Annual Subscription Bundle with support & maintenance <i>Recommended for DocuShare sites with up to 100,000 PPY and other OCR workflow requirements.</i> DocuShare OCR Crawler module ABBYY FineReader Server with no limit on cores for processing for up to 100,000 PPY.	\$2,090
DocuShare OCR Crawler 300K Pages Annual Subscription Bundle with support & maintenance <i>Recommended for DocuShare sites with up to 100,000 PPY and other OCR workflow requirements.</i> DocuShare OCR Crawler module ABBYY FineReader Server with no limit on cores for processing for up to 100,000 PPY.	\$3,470
DocuShare OCR Crawler 500K Pages Annual Subscription Bundle with support & maintenance <i>Recommended for DocuShare sites with up to 500,000 pages and other OCR workflow requirements - better suited for one-time conversion vs ongoing use.</i> DocuShare OCR Crawler module ABBYY FineReader Server with no limit on cores for processing for up to 500,000 TPC.	\$4,060
DocuShare OCR Crawler 1M Pages Annual Subscription Bundle with support & maintenance <i>Recommended for DocuShare sites with up to 1,000,000 pages and other OCR workflow requirements.</i> DocuShare OCR Crawler module ABBYY FineReader Server with no limit on cores for processing for up to 1M TPC.	\$5,200
DocuShare OCR Crawler 3M Pages Annual Subscription Bundle with support & maintenance <i>Recommended for DocuShare sites with up to 3,000,000 pages and other OCR workflow requirements.</i> DocuShare OCR Crawler module ABBYY FineReader Server with no limit on cores for processing for up to 1M TPC.	\$12,130
DocuShare OCR Crawler with 2 Cores & Unlimited Pages Annual Subscription Bundle with support & maintenance <i>Recommended for DocuShare sites with high page volumes and other OCR workflow requirements.</i> DocuShare OCR Crawler module ABBYY FineReader Server with 2 core limit and unlimited page for high volume processing.	\$7,200
DocuShare OCR Crawler with 4 Cores & Unlimited Pages Annual Subscription Bundle with support & maintenance <i>Recommended for DocuShare sites with high page volumes and other OCR workflow requirements.</i> DocuShare OCR Crawler module ABBYY FineReader Server with 4 core limit and unlimited page for high volume processing.	\$10,400

Considerations

- Be sure to base your license on pages and not documents.
- Pricing with annual page limits are not limited by the number of cores you can use.
- Pricing with limited cores have no page limits and can have additional cores added to the license.
- Don't buy a license designated as PPY that's less than the initial number of pages you want to process.
- FineReader is a desktop application that requires someone be logged into the system for it to run, but the desktop can be locked. FineReader can run on servers and VMs. Please consult your security officers about this.
- Recognition Server provides parallel document processing vs FineReader's processing of only one document at a time. This equates to much better throughput for batch processing, so Recognition Server should be used when you want to process documents quickly. We don't recommend FineReader for high volumes.
- Recognition Server supports up to 32 simultaneous workflows with priority settings so that new documents can be added to DocuShare and processed quickly while OCR Crawler is working.
- Recognition Server can be easily constrained to use a specific number of cores rather than all available cores.

Terms used

ASM = Annual Support & Maintenance
MUA = Maintenance & Upgrade Support
PPM = Pages Per Month (process up to specified number of pages per month)
PPY = Pages Per Year (process up to specified number of pages per year)
TPC = Total Page Count (finite number of pages per license)
NPC = No Page Count (limited to certain number of cores and unlimited in regard to pages)
